PROFESSIONAL SUMMARY

Software QA Engineer with 3+ years of experience in automation testing, functional testing, API testing, and performance testing. Experienced with Pytest, Selenium, JMeter, K6, Gatling, Kubernetes, Jira, Agile/Scrum, and Codex as an AI coding assistant for test script creation, debugging, code analysis, requirement-based test case design, and QA workflow acceleration.

WORK EXPERIENCE

Software QA Engineer

Aug 2022 - Present

Torche Indonesia

- Developed and executed automation testing using Pytest and Selenium to support functional system testing.
- Created and ran functional flow and negative case tests to help ensure feature quality before release.
- Performed API testing and performance testing using JMeter, K6, and Gatling.
- Identified bugs, defects, and potential system issues early to support more stable releases.
- Monitored Kubernetes pods and logs to help maintain system reliability and stability.
- Collaborated in Agile/Scrum processes and managed tasks and bug tracking using Jira.
- Used Codex as an AI coding assistant for automation test scripts, debugging, code analysis, test case creation, and QA productivity.

IT Support Specialist Intern

Mar 2019 - Dec 2019

Ministry of Law and Human Rights, Republic of Indonesia

- Troubleshoot hardware, software, and network issues.
- Managed Mikrotik configuration and maintenance.
- Supported development of an online visit registration application.

SELECTED PROJECTS

SDP (Correctional Database System) - Automation testing and functional testing for core system modules.

SIPPT - BSKJI (Integrated Public Service Information System) - End-to-end testing to ensure service flows met requirements.

MBG Dashboard - Dashboard feature validation, data flow testing, and system output verification.

MBG AI Chatbot & AI Generate Text-to-SQL - Testing AI-based features, including chatbot output and generated query validation.

SIPSN (National Waste Management Information System) - Supported system testing and functional flow validation.

IKN Registration - Tested registration user flows to ensure they worked correctly.

IKD (Digital Population Identity) - Supported digital identity system testing and related feature validation.

TECHNICAL SKILLS

Testing & QA: Software Quality Assurance, Test Case Design, Functional Testing, Negative Case Testing, Automation Testing

Automation Tools: Pytest, Selenium, Python Selenium, Typewrite, Selenium SIDE

API & Performance Testing: JMeter, K6, Gatling

Programming & Development: Python, PHP

DevOps & Monitoring: Kubernetes pods monitoring, Kubernetes logs monitoring

Project & Collaboration Tools: Jira, Agile/Scrum, Codex

Soft Skills: Critical Thinking, Problem Solving, Teamwork, Adaptability

EDUCATION

D4 Information Technology / Informatics Engineering	Sep 2016 - Sep 2020
Politeknik Pos Indonesia	

CERTIFICATION

Certificate of Completion - Software Analysis
BNSP | Valid May 2024 - May 2027

LANGUAGE

Bahasa Indonesia - Native | English - Basic
