PROFESSIONAL SUMMARY

Software QA Engineer with more than 3 years of experience in automation testing, functional testing, API testing, and performance testing. Experienced with Pytest, Selenium, JMeter, K6, Gatling, Kubernetes, Jira, Agile/Scrum, and Codex as an AI coding assistant to support test script creation, debugging, code analysis, test case preparation from requirements, and QA workflow acceleration.

WORK EXPERIENCE

Software QA Engineer

Torche Indonesia | Aug 2022 - Present

- Develop and execute automation tests using Pytest and Selenium to support functional system testing.
- Design and run functional flow and negative case testing to help ensure feature quality before release.
- Perform API testing and performance testing using JMeter, K6, and Gatling.
- Identify bugs, defects, and potential system issues earlier to support a more stable release process.
- Monitor Kubernetes pods and logs to help maintain system reliability and stability.
- Collaborate in Agile/Scrum processes and manage tasks and bug tracking using Jira.
- Use Codex as an AI coding assistant to support automation test script creation, debugging, code analysis, test case preparation from requirements, and QA workflow productivity.

IT Support Specialist Intern

Ministry of Law and Human Rights of the Republic of Indonesia | Mar 2019 - Dec 2019

- Handled hardware, software, and network troubleshooting.
- Managed Mikrotik configuration and maintenance.
- Supported the development of an online visit registration application.

SELECTED PROJECTS

SDP (Correctional Database System) - Performed automation testing and functional testing for core system modules.

SIPPT - BSKJI (Integrated Public Service Information System) - Performed end-to-end testing to ensure service flows aligned with requirements.

MBG Dashboard - Validated dashboard features, data flows, and system outputs.

MBG AI Chatbot & AI Generate Text-to-SQL - Tested AI-based features, including chatbot output validation and generated query results.

SIPSN (National Waste Management Information System) - Supported system testing and functional flow validation.

IKN Registration - Tested registration flows to ensure the user journey worked properly.

IKD (Digital Population Identity) - Supported testing for digital identity system features.

TECHNICAL SKILLS

Area	Skills
Testing & QA	Software Quality Assurance, Test Case Design, Functional Testing, Negative Case Testing, Automation Testing
Automation Tools	Pytest, Selenium, Python Selenium, Typewrite, Selenium SIDE
API & Performance Testing	JMeter, K6, Gatling
Programming & Development	Python, PHP
DevOps & Monitoring	Kubernetes pods monitoring, Kubernetes logs monitoring
Project & Collaboration Tools	Jira, Agile/Scrum, Codex
Soft Skills	Critical Thinking, Problem Solving, Teamwork, Adaptability

EDUCATION

D4 Information Technology / Informatics Engineering

Politeknik Pos Indonesia | Sep 2016 - Sep 2020

CERTIFICATION

Certificate of Completion - Software Analysis
BNSP | Valid May 2024 - May 2027

LANGUAGE

Indonesian - Native
English - Basic
